

GIFA

12.06.2023 - 16.06.2023 | Germany, Duesseldorf

International Foundry Trade Fair with Technical Forum

GIFA is one of the world's four leading metals and metalworking trade fairs taking place parallel every three years in Duesseldorf: GIFA (International Foundry Trade Fair), METEC (International Metallurgical Technology Trade Fair), THERMPROCESS (International Trade Fair for Thermo Process Technology) and NEWCAST (International Castings Trade Fair). Top-class congresses and forums complement all these events.

As the global No.1 event, GIFA provides a complete overview of advances in the foundry practice. In 2023 Duesseldorf will again be the venue for the world's leading manufacturers of foundry machinery and plant construction, suppliers of foundry-related materials and auxiliaries, manufacturers of measurement and testing devices for quality assurance, plus engineering companies.

Categories

ies technology

Metallic charge materials

Moulding and core making

Moulding sands

Moulding sand preparation and sand reclamation

Moulding auxiliaries

Gating and feeding

Casting machines and pouring equipment

Knock-out, fettling and finishing

Surface treatment

Welding and cutting

Heat treating and drying furnaces

Transportation and storage

Manipulation

Pattern and die making

Control systems
